

Care pathway for school aged children with impaired attention who may have a diagnosis of ADHD

Referral via SPE for assessment of INATTENTION and/or HYPERACTIVITY

Referrals MUST include parental permission to contact school as the following information will be requested before the first appointment can be offered:

Conners rating Scale — Parent and School

Strengths and difficulties questionnaires (SDQ) — Parent, School, Self if > 11 years old

School report including school intervention plan (or letter stating that there are no concerns)

Educational psychology report if available, outlining response to interventions

For children with mild-moderate inattention/hyperactivity, parents should attend a parenting course prior to referral
