

# Care pathway for school aged children with impaired attention who may have a diagnosis of ADHD

## Referral via SPE for assessment of INATTENTION and/or HYPERACTIVITY

All referrals will be responded to with the following to complete before the referral can be triaged (sent via parents)  
*Conners rating Scale — Parent and School (and self if over 8 years old)*  
*ADHD questionnaire from school*  
*Educational psychology report if available, outlining response to interventions*  
 For children with mild-moderate inattention/hyperactivity, parents should attend a parenting course prior to referral
